LISTING OF CLAIMS

(original) A fluorinated polymer obtained by living anion polymerization of a monomer having the general formula
 (1):

wherein R^1 and R^2 each are an acid labile group and R^3 is hydrogen or methyl, and having a polydispersity index of 1 to 1.20.

2. (original) The fluorinated polymer of claim 1 wherein the monomer has the general formula (2):

$$F_3C \qquad CF_3 \qquad CF_3 \qquad (2)$$

$$R^2O \qquad CF_3 \qquad F_3C \qquad OR^1$$

wherein R^1 and R^2 each are an acid labile group and R^3 is hydrogen or methyl.

3. (new) A process for preparing a fluorinated polymer comprising the step of subjecting a monomer having the general formula (1):

$$\begin{array}{c|c}
 & CF_3 \\
\hline
 & CF_3 \\
\hline
 & CF_3 \\
\hline
 & CF_3
\end{array}$$
(1)

wherein R¹ and R² each are an acid labile group and R³ is hydrogen or methyl, to living anion polymerization in the presence of an organometallic compound as a polymerization initiator in an organic solvent, thereby obtaining the fluorinated polymer having a polydispersity index of 1 to 1.20.

4. (new) A fluorinated polymer having a recurring units of the following general formula (1a):

$$\begin{array}{c|c}
R^3 \\
CF_3 \\
\hline
CF_3 \\
CF_3
\end{array}$$
(1a)

wherein R^1 and R^2 each are an acid labile group and R^3 is hydrogen or methyl.

5. (new) The process of claim 1 wherein the acid labile groups represented by $\ensuremath{\mbox{R}^{1}}$ and $\ensuremath{\mbox{R}^{2}}$ are selected from the group consisting of formulae (3), (4) and (5):

$$-(CH2)g - OR4$$
 (3)

$$\frac{R^{5}}{R^{6}} OR^{7}$$

$$\frac{R^{8}}{R^{9}} R^{10}$$
(5)

$$\frac{R^8}{R^9}R^{10} \tag{5}$$

wherein R^4 is a tertiary alkyl group of 4 to 20 carbon atoms, an oxoalkyl group of 4 to 20 carbon atoms or a group of formula (5);

wherein R⁵ and R⁶ are independently hydrogen or straight, branched or cyclic alkyl groups of 1 to 18 carbon atoms; and

wherein R⁷ is a monovalent hydrocarbon group of 1 to 18 carbon atoms.

- 6. (new) The process of claim 1 wherein the monomer is copolymerized with styrene.
- 7. (new) The process of claim 1 wherein the polymerization is conducted in the presence of a polymerization initiator.
- 8. (new) The process of claim 1 wherein the polymerization is conducted in the presence of a polymerization initiator selected from the group consisting of n-butyl lithium, sec-butyl lithium, tert-butyl lithium, sodium naphthalene, sodium anthracene, —methylstyrene tetramer disodium, cumyl potassium, cumyl cesium, phenyl magnesium bromide, phenyl magnesium chloride, n-butyl magnesium bromide, and n-butyl magnesium chloride.
- 9. (new) The process of claim 1 wherein the polymerization is conducted in the presence of an organic solvent.
- 10. (new) The process of claim 1 wherein the polymerization is conducted in the presence of an organic solvent selected from the group consisting of: cyclic ethers, aromatic hydrocarbons, aliphatic hydrocarbons, and mixtures thereof.
